

HUMAN & VETERINARY MEDICINES

Our regulatory expertise at your service

Staphyt Regulatory can advise and support you in all the regulatory procedures required for assessing the environmental impact of your medicinal products as per Directives 2001/83/EC (medicinal products for human use) or 2001/82/EC (veterinary medicinal products).

Thanks to its solid experience in environmental and ecotoxicological risk assessments for plant protection products, biocides and chemicals in the broad sense, our team is able to assist you in conducting environmental risk assessments for your human and veterinary medicinal products, and thus meet the regulatory requirements relating to environmental protection.

Staphyt Regulatory offers several services for medicinal products for human and veterinary use:

- Regulatory and strategic advice
- Environmental Risk assessment for human medicines (module 1.6 of the MAA dossier)
- Environmental risk assessment for Veterinary Medicines Products (VMP)
- GLP study management
- PBT assessment
- Permitted Daily Exposure (PDE) calculation
- Contact with Authorities
- Technical or regulatory training
- and much more...
